

2978-02-70 Silver Spring Drive Project

Beginning in mid-July, improvements will be made on Silver Spring Ave at the intersections of Long Island Dr, Pick N Save/Heiser Driveway, Bridgewood Ln, Bayshore Dr/Mohawk Ave, and Lydell Ave. Construction will be complete by December.

Improved Signals, Pavement, and Curb Ramps

Traffic Signals will be replaced at several intersections to improve signal function. Pavement upgrades will be performed at all intersections for a smoother ride. Curb ramps will be improved for ADA accessibility.

How Will Traffic Be Impacted?

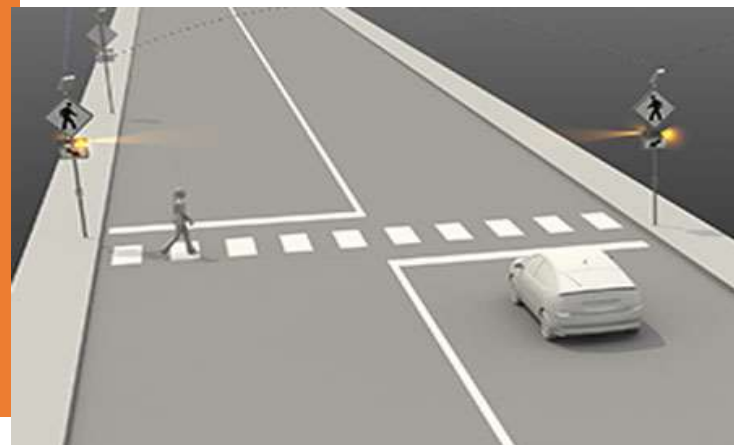

Traffic will be reduced to one lane in each direction on Silver Spring Dr when the project begins. Left turn restrictions will be imposed at all five intersections where improvements will be made. All pedestrian crosswalks will be maintained throughout the project. Several MCTS bus stops will be relocated or shut down temporarily during construction. Please refer to the MCTS website for impacts.

Who Can I Contact With Questions?

Please contact our project construction leader Samuel Martinez at 414-745-1432 (phone) or smartinez@spanllc.com (email)

Rapid Rectangular Flashing Beacon

A new rapid rectangular flashing beacon pedestrian crosswalk will be installed at Long Island Drive to allow pedestrians to cross without the need for a signalized intersection! See the picture to the right for a conceptual drawing of the technology.
